

Introduction to AutoCAD – Frequently Asked Questions

Q. How often is Introduction to AutoCAD run?

This 8-week short course runs up to 4 times a year. Start dates are regularly advertised on the [TAFE SA website](#).

Q. If I enrol but I miss a class, can I catch up?

Yes, arrangements can be made for you to catch up. This will be negotiated with your lecturer.

Q. Will I have access to free AutoCAD software?

Yes, you will be able to download a free student version of AutoCAD after enrolling in this short course.

Note: We recommend you use the Windows version as the Macintosh version has a vastly different User Interface and you will find it difficult to follow the lectures which are conducted in the Windows version of AutoCAD.

Q. Is this short course an extension of what is taught in high school?

The content covered in Introduction to AutoCAD is not associated with CAD curriculum delivered in high school or other vocational training courses, however, some of the same fundamental skills may be included.
