

Student Program

Information

ICT50220 Diploma of Information Technology (Back end web development)

The Diploma of Information Technology, specialising in Back-End Web Development reflects the role of individual in a variety of information and communications technology (ICT) roles who have established specialised skills in a technical ICT function.

Individuals in these roles carry out moderately complex tasks in a specialist field, working independently, as part of a team or leading a deliverable with others. They may apply their skills across a wide range of industries, business functions and departments, or as a business owner (sole trader/contractor).

The skills required for these roles may include, but are not restricted to:

- > designing dynamic and complex websites
- > user experience solutions
- > documents using extensible mark-up languages
- > developing and maintaining website information architecture and data
- > creating and maintaining databases

Employment Opportunities

- > Web designer
- > Database support programmer
- > Web support programmer

The recommended study plan will require 12 months of study to complete this qualification.

IT Studies Subjects

This qualification is from the National Training Package [ICT](#) that is developed by the Commonwealth Government. TAFE SA IT Studies clusters related competencies in the Training Package into subjects. The information below refers to the TAFE SA IT Studies subjects and outlines the competencies that makes up those subjects. Delivery and assessment for the subjects will be done holistically so you will be awarded the same result for all competencies taught in that subject. Your final official results will refer to the competencies listed below.

Course Admissions Requirement

- > Certificate IV in Information Technology (Web Development)

If you do not have a Certificate IV in Information Technology (Web Development) but other relevant qualifications or industry experience, you may wish to email admissions@tafesa.edu.au to discuss.

Information on the contents of the Certificate IV in Information Technology (Web Development) can be found here:

[Certificate IV in Information Technology \(Web Development\) Program Information Document.](#)

Student Program Information

Incidentals

This course also has an incidental cost of \$300.00 for 1TB SSD portable hard drive, webcam and headset with microphone.

Hardware & Software

All software required to complete this course will be available for students at no additional cost.

It is important to note that for students studying this course and not able to attend a suitable campus it will be assumed that you have the necessary computer hardware to run the required resources.

You will need to have a Windows machine with the following as a minimum

- > Intel i5 CPU (or equivalent AMD)
- > 16GB of RAM
- > 1Tb SSD
- > Internet Access

Note: Apple MAC notebooks are not compatible with some of the software required for this course.

Internet

This qualification requires students to use virtual machines for learning activities and assessments. Students will be required to obtain these from either their local campus or from the Internet. Virtual machine file sizes can vary but are generally above 20GB in size. Downloading these virtual machines from the Internet may vary depending on your Internet connection speed.

Required Competencies

Diploma of Information Technology (Back end web development)

National Code: ICT50220 TAFE SA Code: TP01272

This table outlines the competencies required to earn this qualification, along with the IT subjects you need to complete. The competencies and subjects are listed in the recommended order of completion, which is especially crucial for part-time students.

Unit Code	Unit Title	Core/Specialist Elective/Elective	IT Studies subject code
ICTDBS506	Design Databases	Listed Elective	DBS506MSQ
ICTWEB514	Create dynamic web pages	Listed Elective	WEB5C2EWD
ICTDBS507	Integrate databases with websites	Specialist Elective	WEB5C2EWD
ICTWEB430	Produce server-side script for dynamic web pages	Elective	WEB430PHP
BSBXCS402#	Promote workplace cyber security awareness and best practices	Core	XCS402
ICTSAS527#	Manage client problems	Core	SAS527
ICTWEB522	Develop Website Information Architecture	Specialist Elective	WEB5C2CMS
ICTWEB525	Implement quality assurance process for websites	Specialist Elective	WEB5C2CMS
BSBXTW401#	Lead and facilitate a team	Core	XTW401
ICTWEB452	Create a Markup Language Document	Listed Elective	WEB4C3HL5
ICTICT532#	Apply IP, ethics and privacy policies in ICT environments	Core	ICT532
BSBCRT512#	Originate and develop concepts	Core	CRT512
ICTICT517	Match ICT needs with the strategic direction of the organisation	Core	ICT517
ICTPRG554	Manage data persistence using noSQL data stores	Specialist Elective	PRG554MDB
ICTPRG553	Create and develop REST APIs	Specialist Elective	PRG553RST
ICTPRG614	Create cloud computing services	Elective	PRG614AWS
ICTCLD508	Manage infrastructure in cloud environments	Listed Elective	CLD52ACO
ICTCLD506	Implement virtual network in cloud	Listed Elective	CLD5C2ACO

Subject Descriptions

Unit Code	IT Studies subject code	Description
ICTWEB452	WEB4C3HL5	<p>This unit describes the skills and knowledge required to use a text editor to design, create and save web pages to a given specification.</p> <p>The unit applies to individuals working as web designers and developers, who generate a framework for internet information using a markup language according to client briefs.</p>
ICTWEB430	WEB430PHP	<p>This unit describes the skills and knowledge required to produce server-side scripts for dynamic web pages using a range of relevant features from different languages. It applies to individuals working as web designers who apply a wide range of knowledge and skills across different information and communications technology (ICT) environments to support organisations that require broad ICT support.</p>
ICTWEB433	WEB4C2WAP	<p>This unit describes the skills and knowledge required to confirm accessibility of websites for users with auditory, visual, mobility and cognitive impairments.</p> <p>The unit applies to web developers and designers who are required to adhere to international and Australian industry standards and practices to ensure that users with accessibility requirements are not disadvantaged when using websites.</p>
ICTWEB441	WEB4C2WAP	<p>This unit describes the skills and knowledge required to develop interactive and engaging websites, using a range of features from various languages.</p> <p>The unit applies to individuals working in web development environments who are required to produce client-side scripts as a common means of creating interactive websites. These scripts offer an effective simple means of enabling websites to provide greater interaction with clients.</p>
ICTDBS506	DBS506MSQ	<p>This unit describes the skills and knowledge required to establish client needs and technical requirements and to design a database that meets identified requirements.</p> <p>It applies to those who are employed in roles including database administrators or designers who are required to design databases.</p>
ICTWEB514	WEB5C2EWD	<p>This unit describes the skills and knowledge required to produce both server and client-side content for web pages.</p> <p>It applies to individuals working as web developers, who are responsible for creating dynamic pages to provide interaction between the user and the website. They use highly developed technical and analytical skills when developing the user-website interface.</p>
ICTDBS507	WEB5C2EWD	<p>This unit describes the skills and knowledge required to integrate a database with a website.</p> <p>It applies to those employed as web software and database developers and responsible for creating data-driven web applications.</p>
ICTWEB525	WEB5C2CMS	<p>This unit describes the skills and knowledge required to develop and conduct planned and systematic actions to ensure that websites conform to applicable standards and fulfil client expectations.</p>

Student Program Information

		It applies to individuals in the web field of work that use highly developed communication, analysis and technical skills to determine intelligent strategies for ongoing website improvement.
ICTWEB522	WEB5C2CMS	This unit describes the skills and knowledge required to develop information architecture for a complex website that meets business requirements.
BSBXTW401	XTW401	This unit describes the skills and knowledge required to effectively lead and facilitate a team in a workplace within any industry. This unit has a specific focus on the teamwork skills required for team leader or supervisor level (depending on organisational structure) workers with responsibility for others or teams.
BSBXCS402	XCS402	This unit describes the skills and knowledge required to promote cyber security in a work area. It applies to those working in a broad range of industries who as part of their job role support policies, procedures and practice within an organisation that promote cyber security.
ICTICT532	ICT532	This unit describes the skills and knowledge required to maintain professional and ethical conduct, as well as to ensure that personal information of stakeholders is handled in a confidential and professional manner when dealing with stakeholders in an Information and Communications Technology (ICT) environment. It applies to ICT personnel who are required to gather information to determine the organisation's code of ethics and protect and maintain privacy policies and system security.
ICTSAS527	SAS527	This unit describes the skills and knowledge required to liaise and support clients to manage and resolve problems in an Information and Communications Technology (ICT) environment. It applies to individuals who apply high level technical and specialised knowledge in assisting clients to support, manage and resolve problems.
ICTICT517	ICT517	This unit describes the skills and knowledge required to ensure information and communications technology (ICT) products and systems match the strategic direction of the organisation. It applies to individuals whose responsibilities may include improving, evaluating, acquiring, maintaining and supporting ICT for organisations.
ICTPRG554	PRG554MDB	This unit describes the skills and knowledge required to implement a data store and manage data persistence using non structured query language (NoSQL) to provide automatic scaling as well as high performance and availability over semi-structured data. The unit applies to those working as senior software developers, senior back end developers or full stack developers, and responsible for managing information and communications technology (ICT) in small-to-large enterprises (SMEs).
ICTPRG553	PRG553RST	This unit describes the skills and knowledge required to create and implement representational state transfer (REST or RESTful) application program interfaces (APIs) in order to request and manipulate data from data sources. The unit applies to those working as senior software developers, senior back end developers or full stack developers, and responsible for managing

Student Program Information

		information and communications technology (ICT) in small-to-large enterprises.
ICTPRG614	PRG614AWS	<p>This unit describes the skills and knowledge required to design, build, test and deploy web services and cloud computing applications to specifications.</p> <p>It applies to individuals in software engineering roles with the Information and Communications Technology (ICT) skills required to create and install web services and cloud computing applications.</p>
ICTCLD508	CLD52ACO	<p>This unit describes the skills and knowledge required to configure, monitor, maintain and update resources running in a cloud environment.</p> <p>It applies to cloud engineers, cloud systems administrators and those who work within cloud computing environments and responsible for the day-to-day running of cloud resources.</p>
ICTCLD506	CLD52ACO	<p>This unit describes the skills and knowledge required to design and configure a virtual network according to networking requirements for a multi-tiered application on a cloud platform.</p>
BSBCRT512	CRT512	<p>This unit describes the skills and knowledge required to originate and develop concepts for products, programs, processes or services to an operational level.</p> <p>The unit applies to individuals who develop concepts for any business or community activity or process. This may include marketing and advertising campaigns, staff development programs, information technology and communication systems, radio and television programs and entertainment events. These individuals operate with a high degree of autonomy and also collaborate with others to generate ideas and refine concepts for implementation.</p>

Student Program Information

TAFE SA Study Plan for Full-Time Students (12 months)

The following table shows the recommended study plan for the Diploma of Information Technology (Back end web development). Each stage is one semester (or 6 months) in length for Full-Time student*.

These are eligible for Subsidised Training

Please Note: This program structure is subject to change.

Stage 1	
Term 1	Term 2
DBS506MSQ (2) ICTDBS506	
WEB5C2EWD (2) ICTWEB514, ICTDBS507

Practical (6)	Practical (6)
20 hrs / week	20 hrs / week

Please Note: This program structure is subject to change.

Legend:

- * The length of time for Part-Time students will depend on the number of subjects studied in each semester.
- () The number in brackets after the subject is the indicative number of contact hours per week that you expect to study at a TAFE SA campus for that subject.
- # This subject will be offered exclusively as online study in the registration period

Practical sessions to complete subject activities, assignments and tests

NOTE: The study plan is for a full-time student with class-attendance. This is usually between 16-20 hours a week of attendance. It is expected that an additional 12-15 hours would be required outside of class time to complete activities and assessments.
