

hello! 🐾
my name is

**cuddlepup
for adoption**

DAISY

age: 4 years

sex: Female

desexed: YES

**a little
about me**

- Daisy is a bright, sweet, snuggly, bubbly, and affectionate little girl. She is calm, quiet, respectful, confident and cuddly with everyone she meets.
- She wants to say hello to everyone she meets and adores people and wants to be around them. She will get wriggly and excitable when first saying hello to people but settles quickly.
- She is a social butterfly that likes going for walks, meeting people or doing the odd zoomie. She is a big leaner to get cuddles and is respectful taking treats.
- She is a loose lead walker but tires quickly. She can get unsure at times but will look to the human for guidance and gets confident quickly with reassurance
- Is good with dogs of all sizes and breeds but is protective of her personal space if the other dog is pushy or rude.
- Would prefer to live alone and be the centre of attention, however, could also live with a doggy friend of any size.
- Children 5+
- She is apartment or small yard suitable
- Has never been tested with cats or pocket pets
