

How to Guide

Set a Proxy Server - Android Phone or Tablet

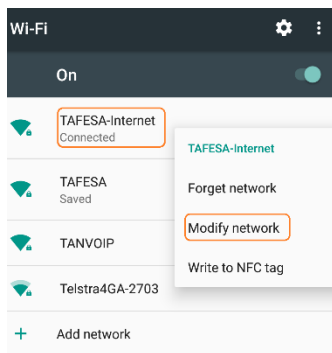

ICT Services

Setting a proxy on an Android phone or tablet (7.0)

1. Ensure you are connected to the TAFESA-Internet wireless network by double-sliding down your notification bar to display as shown below.

2. Long-press on TAFESA-Internet, and in the small pop-up window, select 'Modify network'.

- Slide the TAFESA-Internet pop-up window down until you see the Advanced options button, and click on the arrow to expand it as below. Enter 'proxy' in the Proxy hostname and '8080' in the Proxy port fields as below, and click on 'Save'.
