

How to Guide

Set a Proxy Server - Apple iPhone or iPad

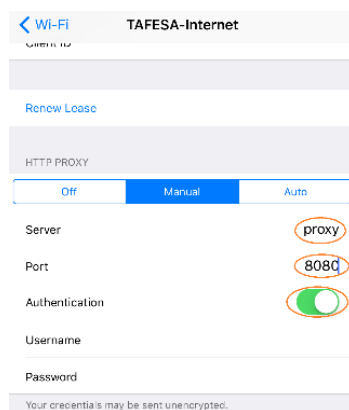

ICT Services

Setting a Proxy on an Apple iPhone or iPad (10.0.2)

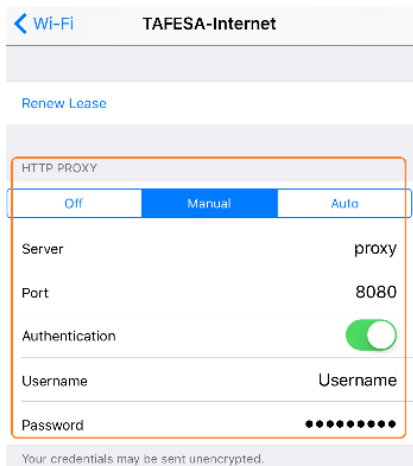

1. Ensure you are connected to the TAFESA-Internet wireless network (there should be a tick next to it in the Wi-Fi Settings, as shown below). Then, press the 'i' on the right.

2. Swipe down, and under the heading HTTP Proxy, select 'Manual'. In the Server field, enter the word 'Proxy' and in the Port field, enter '8080'. Slide the Authentication button to the right until it turns green.

3. Enter your TAFESA Username and Password in the fields that are displayed, and then press the Wi-Fi button at the top-left.
