## Set a Proxy Server - Windows 10 Laptop

### ICT Services

---

#### Setting a proxy on a Windows 10 Laptop

1. Ensure you are connected to the TAFESA-Internet wireless network.
2. Click or press the 'Windows' button in the bottom-left corner of the screen, then type proxy, and select Change proxy settings.

3. Slide the bar under Use a proxy server to 'On'. In the Address field, type the word 'proxy' and in the Port field type '8080'. Then, click the 'Save' button.
