

How to Guide

Set a Proxy Server - Windows 10 Mobile

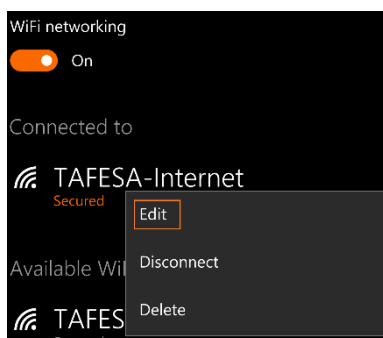

ICT Services

Setting a proxy on a Windows 10 Mobile

1. Ensure you are connected to the TAFESA-Internet wireless network by sliding down your notification bar.

2. Long-press on the TAFESA-Internet icon, and then press the Edit button.

3. On the Editing network screen, adjust the Proxy drop-down menu to 'Manual set-up'. In the Address field, add the word 'proxy' and in the Port field, add '8080'. Slide the Sign in to proxy button to On, and enter your TAFESA username and password into each field.
