# CONFIGURING IPHONE & IPAD FOR THE TAFESA-INTERNET WIRELESS NETWORK

---

Please ensure you have the following details ready before you commence:

- Your TAFESA network username and password.

**\*\* Most wireless devices should be able to automatically connect to the TAFESA-Internet wireless network by selecting the network and detecting the settings. If your device does not support this feature please follow the instructions contained in this guide.**

**\*\* ICT Services recommend you perform a backup of your device before proceeding with the steps outlined in this guide.**

1. Ensure you are in range of the **TAFESA-Internet** wireless network, i.e. your campus library, as not all areas of each campus are in wireless range.
2. From the home screen, as shown below, select **Settings**.

- From the **Settings** screen select **Wi-Fi**.

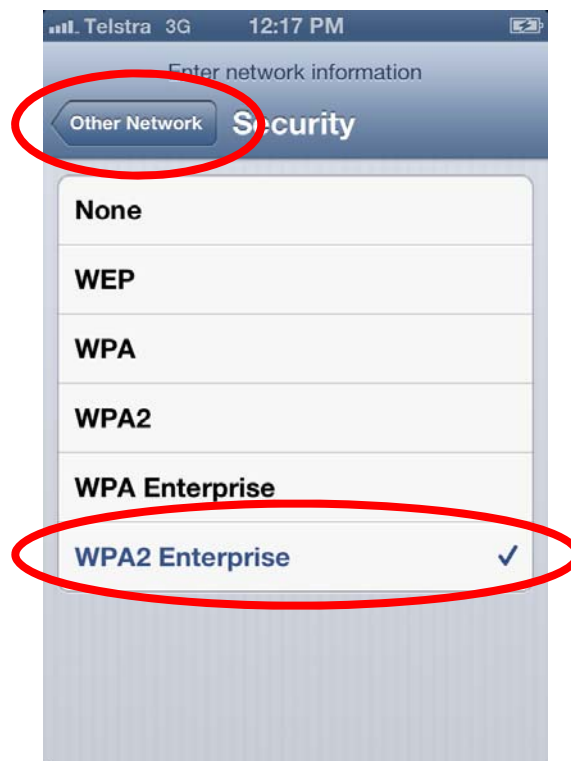

- From the **Wi-Fi Networks** screen select **Other...**

5. Enter the **TAFESA-Internet** in the **Name** field and then select **Security**.

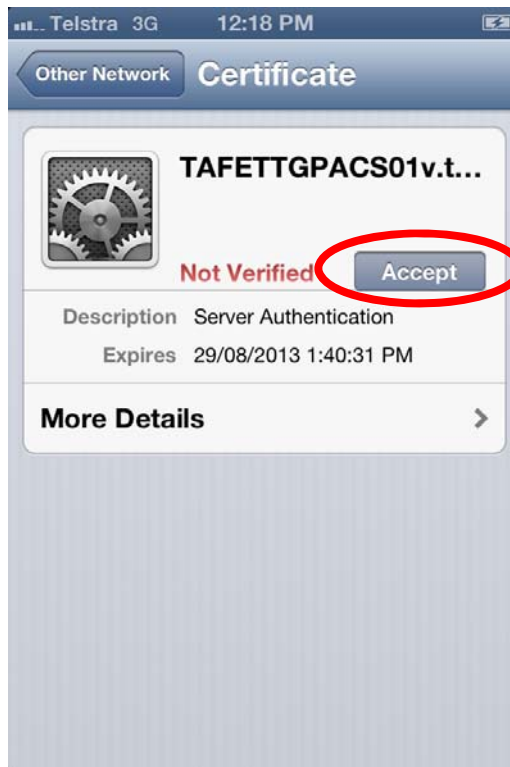

6. From the **Security** screen select **WPA2 Enterprise** and then select **Other Network**.

7. On the **Other Network** screen, enter your **TAFE network username** and **password** in the **Username** and **Password** fields and then select **Join**.

8. The device will then verify your details and configure the wireless network. On the **Certificate** screen select **Accept**.

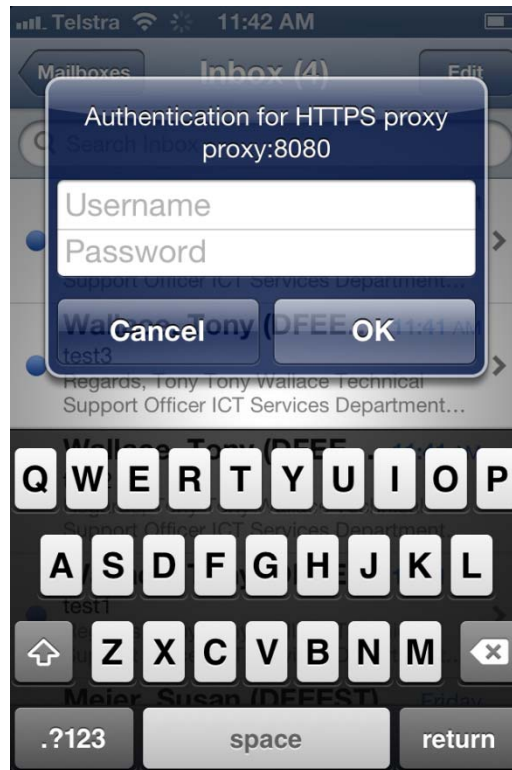

9. A tick will appear next to **TAFESA-Internet**, once this has appeared, select the **arrow** on the same line.

10. Swipe down and select **Manual** under **HTTP Proxy**. In the **Server** field enter **proxy** and in the **Port** field enter **8080**.

11. Your iPhone or iPad should now be correctly connected to **TAFESA-Internet** When browsing the internet or checking mail for the first time each day you may be prompted for a username and password, enter your **TAFESA network username** and **password** to continue.

**Disclaimer:** The Department of Further Education, Employment, Science and Technology (DFEEST) is not liable for any loss resulting from any action taken or reliance made by students on any information contained within this document (including, without limitation, third party information). Students obtain access to the wireless network at their own risk and DFEEST accepts no responsibility for any interference, loss, damage or disruption to privately own computer system which arises in connection with the use of this network. Students must take their own precautions to ensure that the process which they employ to obtain access to this wireless network does not expose them to the risk of viruses, malicious computer code or other forms of interference which may damage their own computer system.
